

Happy New Year

Thanks for a Great Year!

On December 28th, 2020, WiGL launched its first-ever capital raise on StartEngine. And oh what a year it has been.

Thanks to your continued support, WiGL became the 1st Reg CF on StartEngine to hit the \$5M cap.

And most important, WiGL demonstrated the first-ever truly touchless-wireless electrical power network. In partnership with Florida International University, we (you included) made history. WiGL is both honored and humbled at what we've done together

in just 12 months.

We are well on our way to achieving great things, to include creation and demonstrate of 2 separate touchless wireless power networks using commercial off-the-shelf parts. WiGL is working with our experts and partners to maximize the power received and improve the network efficiency.

WiGL is excited to bring these network demonstrations to the masses in the new year.

But we're not done yet!

As some of you have learned, WiGL has applied to the SEC for our second raise as part of a proposed Reg A+ raise on StartEngine. The Reg A+ raise will position WiGL to attempt to gain majority market share. Most important to you, the proposed Reg A+ raise increases your Reg CF share value more than 2.5 times.

So, as we enter the happy holiday season, thank you for being a part of this amazing world changing journey. Thanks for supporting WiGL from the start and as promised, we are doing all we can to grow your investment.

Team WiGL wishes you and your families a very healthy and safe year 2022.
