

Wow - What a 2nd Month.

Team WiGL travelled to an US Air Force (USAF) Base and met face-to-face with the end user war-fighters to plan how WiGL will meet their very specific needs. And again, we think it was a smashing success!

Here's where we are with the USAF:

1. WiGL has been working on the 1st of 10 contracted deliverables for the 2nd USAF contract
2. WiGL has requested permission from USAF Public Affairs (PA) Offices to share the name of the base and specifics about the wireless power networking contract (this may take some time; please be patient with us).

Military and civilian names, faces and location redacted until PA approval is granted.

1. WiGL is in negotiations for additional follow-on contract(s); more to follow as we learn more
2. The **WiGL's World Fair 2.0 (WWF 2.0)** has officially started
3. WiGL has secured four (4) hardware partnerships for WWF (the WiGL network is wireless power hardware provider agnostic)
4. The WiGL network will recharge both Apple and Samsung mobile devices, used by the USAF

Here's where we are with the Reg A+:
